  - g. **Accessibility Testing**: Verify that the web meets accessibility guidelines, including support for screen readers, proper color contrast, and keyboard navigation.
-

---

---

## **6. Test Environment**

We tested the application according to test areas including:

- a. Checking the various functions in the site's menu.
  - b. Checking the login area.
  - c. Checking the "אירועים וחברות" area .
  - d. Checking the shipping area.
  - e. Checking the promotions area.
- 

## **7. Recommendation**

- a. Fixing the blurry icons at the bottom of the page.
  - b. Allows to view the meal menu item without entering a delivery address.
  - c. Allows to view the pizzas deals item without entering a delivery address.
  - d. Making sure to write a uniform text without spelling errors, without jumps in the ceremony, unequal spaces.
  - e. Improving the loading time of the pages on the site.
-

---

## **8. Conclusion**

Following the tests we performed on the Domino's Pizza website in order to verify its proper functioning, we found a large number of bugs issues. However, the severity of the bugs are range between major to low level and allows the customer to continued normal and continuous work in most of the functions that the site contain .

At the bottom line - The customer can make any order he wants from the existing menu.

As a result, I recommended releasing the site.

## Description

### Steps to Reproduce

1. Access the following link: <https://www.dominos.co.il/>
2. Scroll down the page until you reach the bottom.
3. Go to the section where the links to YouTube, Instagram, and Facebook are located.
4. Perform multiple rapid clicks below the links section.

### Actual Result

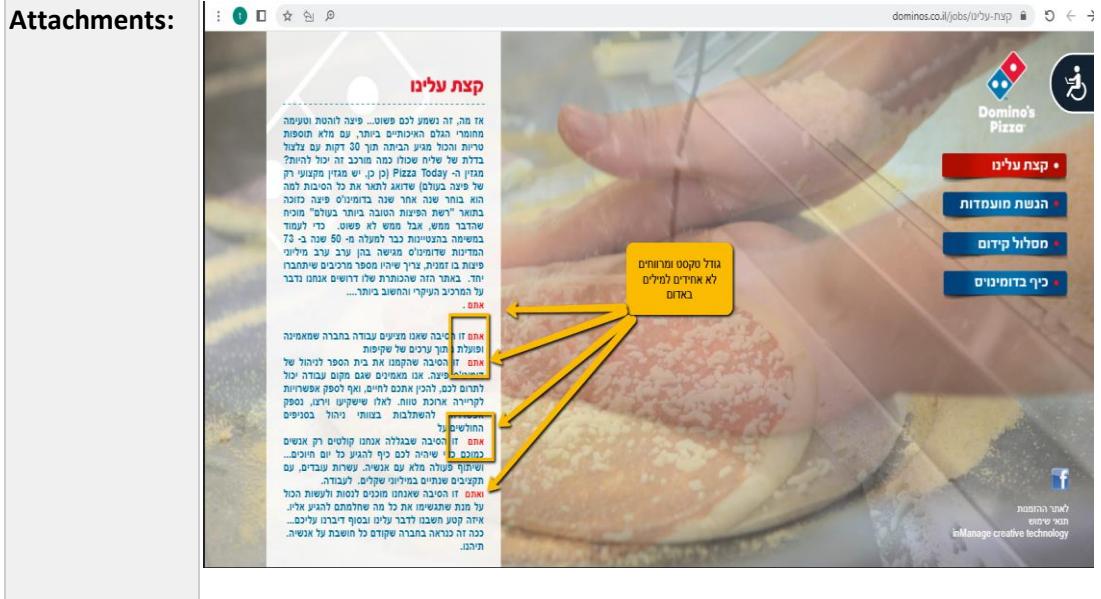

When rapidly clicking multiple times below the links section, it leads to visual disturbances on the page. The rapid clicking causes unintended visual changes, flickering, or distortions, creating a distracting and potentially disorienting experience for users.

### Expected Result

Performing rapid clicks below the links section should not cause visual disturbances or unexpected visual changes on the page. The user interface should remain stable and provide a smooth browsing experience, regardless of the speed of the clicks.

## Description

### Steps to Reproduce

1. Access the following link: <https://www.dominos.co.il/>
2. Scroll down the page until you reach the bottom.
3. Locate a specific link that includes a phone number and address.

### Actual Result

The specific link displays a phone number and address, but the text is black, making it difficult to read due to being on a black background. This results in poor visibility and legibility.

### Expected Result

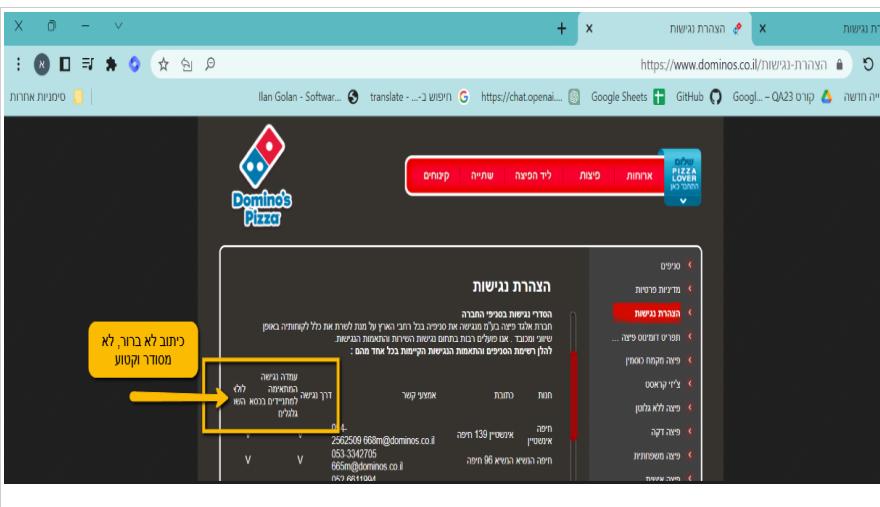

The phone number and address within the specific link should be clearly visible and legible, with text that contrasts properly with the background for easy reading.
